This year's conference theme is: **CTE Teachers, Our Virtual Heroes**

We seek high-quality proposals that address a full range of issues facing CTE educators, administrators and other key stakeholders as they strive to prepare students with the knowledge and skills to succeed in the 21<sup>st</sup> century economy. Quality sessions will engage the audience and provide attendees with practical, “how to” ideas and resources that directly impact CTE programs and student achievement. Sessions typically average 60 minutes in length and should allow time for questions.
